We're pushing to have both done. WA we hope to have out next week. WE ran QA on it and corrected some things and it just came to my desk to review and send back to Diane to finalize. OR, we are working on the new data, got that squared, and should have a version soon – I think mid-December is fairer for that meeting. We are also updating two small memos summarizing the SSN and SEM analyses.

Hi Mike,

Just checking in – re WA, our next meeting is scheduled for November 28 – hope that is on your calendar. Re the Oregon project, do you have an updated ETA for the draft document, and should we wait until mid-December to meet? Just let me know. Thanks again, Rochelle

Hi Mike,

Thanks for the update – it sounds like it works just to cancel this WA call and keep the next call, and I will set up a call with ODEQ the first week in December.

Thanks again, Rochelle

Subject: WA NSTEPS meeting

Rochelle –

Hey! Diane is finishing a draft report for WA this week. I would like to read it and edit it before we send it out next week. Then I think we should give the state 2 weeks to review.

For this reason, we don't have anything new to report on the WA project next week and am arguing we can either defer to the next meeting or reschedule it for 3 weeks from tomorrow (since they should have a draft by early next week).

With regards to OR:

We sent a note to Dan about Grande Ronde data he requested (there is none)
We have run taxonomic reconciliation on all the new diatom data; Diane will match to chemistry and we should have a memo on that by the first week in November
I am editing the SEM and SSN memos
So, we should have OR current phase nearly wrapped up by the end of November.
Let us know what you think about WA call for tomorrow. I am happy to chat if there are other reasons to do it, but we don't have any new NSTEPS insights – just writing reports.
Thanks

MP
